Nature Walk

Age: 2-5 years

What’s needed
No materials needed

What to do
1. Take your class on a nature walk.
2. While you are walking, keep track of different kinds of animals or insects you see.
3. For older children, you might even have them look for more specific animal signs – spider webs, ant hills, feather, animal tracks, bird calls, nests, etc.
4. Make it a group effort to find things, not a competition among the children.

What children will learn
Observation skills, science and nature
